# VerifyMe™ collaborates with HP Indigo to solve the global brand protection problem.

VerifyMe's RainbowSecure™ powered by HP Indigo

VerifyMe™ offers innovative security solutions that protect industries, governments and individuals from the rising threat of fraud, identity theft and counterfeit products. Whether overt, covert or forensic, VerifyMe's solutions are *secure, resilient, easy to implement and cost-effective.*

2 RainbowSecure offers item level serialization
Variable hidden images are applied at point of manufacture and read through the distribution channel to ensure brand authenticity.

AA123456

1 An HP Indigo manufactured canister, containing VerifyMe RainbowSecure security pigments, is placed in one of the seven ink stations.

3 Hidden images are read with a simple to use optically tuned camera. The images cannot be copied or scanned.

Introducing: VeriPAS™

Global track-and-trace engine for use with VerifyMe RainbowSecure™ security pigments & Micro Focus GPAS Software

VeriPAS™ authenticator device + mobile app
